

TABLE OF CONTENTS

FROM THE EDITOR

Evidence helps, but some decisions remain within the art of medicine **88**

In bacterial meningitis, precise diagnosis by lumbar puncture both offers benefit and poses risk.

B.F. MANDELL

THE CLINICAL PICTURE

Ring-enhancing cerebral lesions **104**

The patient has poorly controlled HIV, seizures, and brain lesions. Is *Histoplasma* or *Toxoplasma* the cause of the lesions?

A. BARBARYAN, J. MODI, W. RAQEEM, M.I. CHOI, A. FRIGY, AND A.E. MIRRAKHIMOV

1-MINUTE CONSULT

When should brain imaging precede lumbar puncture in cases of suspected bacterial meningitis? **111**

Few patients need it. Empiric antibiotic and corticosteroid therapy must not be delayed.

A.E. MIRRAKHIMOV, A. GRAY, AND T. AYACH

MEDICAL GRAND ROUNDS

Thrombotic microangiopathies: Similar presentations, different therapies **114**

Effective management depends on prompt diagnosis and targeted therapy.

G.B. APPEL

REVIEW

Severely frail elderly patients do not need lipid-lowering drugs **131**

Statins have no role as primary prevention in this population, and a minor role as secondary prevention.

L.H. MALLERY, P. MOORHOUSE, P.M. VEYSEY, M. ALLEN, AND I. FLEMING

Online Features

Access

Cleveland Clinic Journal of Medicine content is readily available to all and is free of charge at www.ccjm.org. On your first visit, we will ask you to take a few minutes to register, but subsequent visits will be unencumbered except for an occasional request for your e-mail address when you visit using another device (eg, mobile phone, tablet).

Services

- Navigate quickly to articles in current and past issues via links on the home page and pull-down menus at the top of the page. Use the search function to find a specific article, or browse by topic or article type.
- Continuing medical education activities are accessible from article links and from a CME pull-down menu on the home page. Participation is free.
- Follow links on the home page to news, summaries of recent scientific meetings, and interactive quizzes.
- Click on the PDF symbol at the top of any online article to read, download, or print the article in PDF format.

Social Networking

To post a *CCJM* article to Facebook or Twitter, just click on the icon at the top of any online article.

Upcoming Features

- **Bedbugs are back—Don't let them bite**
- **Antibiotic stewardship: Why we must, how we can**
- **PCI for stable angina—Why do we still do it?**
- ***H pylori* treatment: Infectious disease principles apply**
- **Female sexual dysfunction: Evaluation and management strategies**
- **Bleeding varices: Who should receive a shunt?**
- **Designer estrogens: A range of options**

EDITORIAL

Statin therapy in the frail elderly: A nuanced decision **143**

Clinicians—and patients—may reasonably feel there is value in statin therapy—even in advanced frailty.

D. CLARK III AND L.S. CHO

IM BOARD REVIEW

Man's best friend, fatal in the end **146**

A dog bite in a patient without a spleen can have serious consequences.

E. LING, S. HOWELL, M. VANG, AND P. ARONOWITZ

REVIEW

Medical management of urinary incontinence in women **151**

It is common, underreported, and undertreated. Primary care physicians can offer conservative management.

E. SHIH, H. HIRSCH, AND H.L. THACKER

INFORMATION FOR PATIENTS

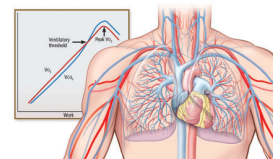

Urinary leakage: What are the treatment options? **159**

REVIEW

Cardiopulmonary exercise testing: A contemporary and versatile clinical tool **161**

It has a class I recommendation for evaluating dyspnea of uncertain cause and in candidates for heart transplant.

K. LECLERC

DEPARTMENTS

CME Calendar **90**

Letters to the Editor **91**

Readers comment on opioids and sleep apnea (June 2016) and on submassive pulmonary embolism (December 2016).

CME Instructions **Inside back cover**
