

Men's health 2018

NOVEMBER 2018

In the article by Chaitoff et al (Men's health 2018: BPH, prostate cancer, erectile dysfunction, supplements. *Cleve Clin J Med* 2018; 85(11):871–880, doi:10.3949/

ccjm.85a.18011), the prostate-specific antigen level of a 60-year-old man was given as 5.1 mg/dL. The unit of measure should have been 5.1 ng/mL. This has been corrected online.
