## Table of Contents

**From the Editor**
- A sneaky vascular disease 581
  Cholesterol embolization syndrome may provide insights into atherosclerotic disease.  
  Brian F. Mandell, MD, PhD

**The Clinical Picture**
- Verrucous plaques on the face, dysphagia, and limb weakness 587
  An itchy bump on the upper lip rapidly grew and spread.  
  Kerry Hennessy, MD; Mahmoud Shorman, MD, MHA

- Miliary tuberculosis in a patient with end-stage liver disease 590
  Chest radiography showed patchy left basilar consolidation with subtle, diffuse interstitial opacities.  
  Victoria Poplin, MD; Brent Harbaugh, DO, MA; Matthias Salathe, MD; Nathan C. Bahr, MD, MA

**1-Minute Consult**
- When is contrast needed for abdominal and pelvic CT? 595
  The decision to use contrast depends on the diagnosis suspected.  
  Mark Radetic, MD; Robert DeVita, MD; John Haaga, MD

- Should we give triple therapy to patients with atrial fibrillation after percutaneous intervention? 599
  Triple therapy is aggressive and carries high risks of bleeding and death.  
  Asim Kichloo, MD; Michael M. Aljadah, MD; Farah Wani, MD; Sindhura Ananthaneni, MD

**Commentary**
- Overcoming obesity: Weight-loss drugs are underused 602
  Successful management of obesity requires a multifaceted approach.  
  Amjad Kanj, MD, MPH; Diane Levine, MD, FACP

**Symptoms to Diagnosis**
- Peripheral artery disease and unusual skin findings 605
  A 68-year-old man was admitted because of worsening skin problems in his legs.  
  Aaron Andrew Heigaard Smith, MD; Erin Luxenberg, MD; Roberta Meyers, MD, MPH
