## From the Editor

**A sneaky vascular disease**

Cholesterol embolization syndrome may provide insights into atherosclerotic disease.

Brian F. Mandell, MD, PhD

## The Clinical Picture

**Verrucous plaques on the face, dysphagia, and limb weakness**

An itchy bump on the upper lip rapidly grew and spread.

Kerry Hennessy, MD; Mahmoud Shorman, MD, MHA

**Miliary tuberculosis in a patient with end-stage liver disease**

Chest radiography showed patchy left basilar consolidation with subtle, diffuse interstitial opacities.

Victoria Poplin, MD; Brent Harbaugh, DO, MA; Matthias Salathe, MD; Nathan C. Bahr, MD, MA

## 1-Minute Consult

**When is contrast needed for abdominal and pelvic CT?**

The decision to use contrast depends on the diagnosis suspected.

Mark Radetic, MD; Robert DeVita, MD; John Haaga, MD

**Should we give triple therapy to patients with atrial fibrillation after percutaneous intervention?**

Triple therapy is aggressive and carries high risks of bleeding and death.

Asim Kichloo, MD; Michael M. Aljadah, MD; Farah Wani, MD; Sindhura Ananthaneni, MD

## Commentary

**Overcoming obesity: Weight-loss drugs are underused**

Successful management of obesity requires a multifaceted approach.

Amjad Kanj, MD, MPH; Diane Levine, MD, FACP

## Symptoms to Diagnosis

**Peripheral artery disease and unusual skin findings**

A 68-year-old man was admitted because of worsening skin problems in his legs.

Aaron Andrew Heigaard Smith, MD; Erin Luxenberg, MD; Roberta Meyers, MD, MPH
