CONTENTS

FROM THE EDITOR

Double the reasons for giving the flu vaccine in 2020
Limiting the impact of other diseases, possibly including COVID-19.
Brian F. Mandell, MD, PhD

THE CLINICAL PICTURE

Spur-cell anemia
A man with liver disease presents with dizziness and fatigue.
Satish Maharaj, MD; Drew Murray, MD; Simone Chang, MD; Kamila Cisak, MD

COMMENTARY

COVID-19 and flu: Dual threat, dual opportunity
Measures to combat COVID-19 can minimize the impact of flu, and vice versa.
Sherif Beniameen Mossad, MD, FACP, FIDSA, FAST

1-MINUTE CONSULT

Does my healthy 65-year-old patient still need the 13-valent pneumococcal conjugate vaccine (PCV13)?
The short answer is no—but it is not that simple.
Craig D. Nielsen, MD, FACP; Xian Wen Jin, MD, PhD

COVID-19 CURBSIDE CONSULTS

Recognition and management of respiratory co-infection and secondary bacterial pneumonia in patients with COVID-19
Consider the presentation and trajectory of illness.
Chao-Ping Wu, MD; Fatima Adhi, MD; Kristin Highland, MD

COVID-19 CURBSIDE CONSULTS

Convalescent plasma for COVID-19: Promising, not proven
The evidence is suggestive but weak. Trials are ongoing.
Simon R. Mucha, MD; NurJehan Quraishy, MD

CONTINUED ON PAGE 644
Using and interpreting electrodiagnostic tests 671
They supplement a neurologic examination in a variety of neuromuscular conditions.
Matthew R. Ginsberg, MD; John A. Morren, MD; Kerry Levin, MD

Contrast media in patients with kidney disease: 683
An update
The risk of acute kidney injury is real, but lower than initially thought.
Ali Mehdi, MD, MEd; Jonathan J. Taliercio, DO; Georges Nakhoul, MD, MEd

The effect of disease-modifying antirheumatic drugs on vaccine immunogenicity in adults 695
Patients can have variable responses to vaccines, depending on the vaccine and the DMARD.
Alvin Lee Day, MD; Kevin L. Winthrop, MD, MPH; Jeffrey R. Curtis, MD, MS, MPH
