### From the Editor

**A seaworthy nautical tale and a pictured rash** 453
In history's first randomized controlled trial, James Lind gave 2 sailors lemons and oranges, and they got better.
Brian F. Mandell, MD, PhD

### COVID-19 Curbside Consults

**Coagulopathy in COVID-19: Manifestations and management** 461
Prophylaxis against venous thromboembolism is recommended for all patients hospitalized with COVID-19.
Simon R. Mucha, MD; Siddharth Dugar, MD; Keith McCrae, MD; Douglas Joseph, DO; John Bartholomew, MD; Gretchen L. Sacha, PharmD, RPh, BCCCP; Michael Militello, Pharm D, RPh, BCPS

**Thoracic imaging in COVID-19** 469
Typical findings include bilateral multifocal parenchymal opacities, predominantly in the peripheral and lower zones.
Ruchi Yadav, MD; Debasis Sahoo, MD, FCCP; Ruffin Graham, MD

### The Clinical Picture

**Acute dacryocystitis** 477
Inflammation of the lacrimal sac is related to obstruction, which can be primary or secondary.
Satvinder Singh Bakshi, MS, DNB

**Scurvy: Old, but still relevant** 478
A patient with alcohol use disorder presented with progressively worsening fatigue, dyspnea on exertion, and easy bruising.
Mohamed A. Elfeki, MD, MSc; Tyler Schwiesow, MD, FACP; Zeeshan Jawa, MD, FACP

### 1-Minute Consult

**Should we monitor troponin up to peak value when evaluating for acute coronary syndrome?** 480
No. Once troponin is over the 99th percentile, finding the peak value does not aid in diagnosis.
Nolan Anderson, MD; Samuel T. Ives, MD; Michelle D. Carlson, MD; Fred Apple, PhD, DABCC

### Editorial

**Cardiac troponin testing: Goodbye, ‘troponinemia’** 483
Any troponin elevation is prognostically important; dismissing it as “troponinemia” is no longer a viable strategy.
Anirudh Kumar, MD; Divyang R. Patel, MD; Venugopal Menon, MD

REVIEW .............................................................................................................................. 485
Rhinosinusitis and the role of imaging
Imaging should only be used in complicated sinus infections, in recurrent or chronic sinus disease, or in surgical planning.
Nicole Frerichs, DO; Andrei Brateanu, MD, FACP

REVIEW .............................................................................................................................. 493
Pneumonia and alcohol use disorder: Implications for treatment
Patients with alcohol use disorder are at increased risk for Streptococcus pneumoniae but not resistant gram-negative infections.
Niyati M. Gupta, MD; Abhishek Deshpande, MD, PhD; Michael B. Rothberg, MD, MPH

REVIEW .............................................................................................................................. 501
Irritable bowel syndrome with diarrhea: Treatment is a work in progress
Understanding of its mechanisms is progressing, and treatments are increasingly targeted to the individual etiology.
Michael Kurin, MD; Gregory Cooper, MD

LETTERS TO THE EDITOR ........................................................................................................ 456
Perinatal depression
Elise Laflamme, MD
In Reply: Peripartum depression
Maureen Sayres Van Niel, MD; Jennifer L. Payne, MD

DXA after menopause
Michael Balkin, MD
In reply: DXA after menopause
Kristi Tough DeSapri, MD; Rachel Brook, MD

Aspirin for primary prevention
Elise Henning, MD, MEd
In reply: Aspirin for primary prevention
Aldo L. Schenone, MD; A. Michael Lincoff, MD
