From the Editor

Trying to get ahead of Alzheimer disease
Sorting out patients destined to have Alzheimer disease remains a challenge.
Brian F. Mandell, MD, PhD

COVID-19 Curbside Consults

SARS-CoV-2 and myocardial injury: Few answers, many questions
What is the mechanism? Is this a distinct population? What are the treatment options?
Paul C. Cremer, MD

COVID-19 Curbside Consults

Management of patients with COVID-19 in the MICU
The main goals are to ensure caregiver safety and provide the highest quality care.
Chao Ping Wu, MD; Mani Latifi, MD; Eduardo Mireles-Cabodevila, MD

The Clinical Picture

5-Fluorouracil–induced encephalopathy
A woman on chemotherapy for rectal cancer presents with mental status changes.
Yudai Yano, MD; Akira Kuriyama, MD, MPH

The Clinical Picture

Polypoid melanoma mistaken for verruca vulgaris
Polypoid melanoma is highly aggressive and often misdiagnosed.
Andrea Tan, MD; Daniel Gutierrez, MD; Nooshin K. Brinster, MD; Jennifer A. Stein, MD, PhD

Commentary

Emerging blood-based biomarkers for Alzheimer disease
A blood test for Alzheimer disease could help in drug development and patient care.
Lynn M. Bekris, PhD; James B. Leverenz, MD

1-Minute Consult

Should women with HPV-related noncervical cancers be considered at high risk for cervical cancer?
Yes. Lacking guidelines, close surveillance is prudent.
Suneela Vegunta, MD; Margaret E. Long, MD

Editorial

The HPV vaccine: Understanding and addressing barriers to vaccination
Key steps include optimizing clinician-patient communication.
Pelin Batur, MD
