## Table of Contents

### From the Editor

We have a greater understanding of ‘cardiac syndrome X,’ but questions remain  
A better understanding of angina due to ischemia and no obstructive coronary artery disease has led to recognition of coronary microvascular dysfunction in many of these patients.  
Brian F. Mandell, MD, PhD

### The Clinical Picture

Revisiting the ‘great masquerader’  
An HIV patient presents with scaly brown lesions on the palms and soles, mildly painful oral erosions, and a buzzing sound in the right ear for the past 20 days.  
Raihan Ashraf, MD; Rahul Mahajan, MD; Debajyoti Chatterjee, DM; Kollabathula Arpitha, MD

Chest pain: The importance of serial ECGs  
Repeat electrocardiograms in a 44-year-old man who presented with severe hypertension revealed de Winter and Wellens patterns.  
Rene Jansen van Rensburg, MBChB, MD; Jason Schutte, MBChB; Thomas de Beenhouwer, MD

### Editorial

Fungus among us: A poster child for diagnostic stewardship  
When interpreting the significance of Aspergillus species in respiratory culture, first ask if the culture was clinically indicated, or if this was an incidental finding.  
Sherif Beniameen Mossad, MD, FACP, FIDSA, FAST

### 1-Minute Consult

Is Aspergillus isolated from respiratory cultures clinically significant?  
Aspergillus is ubiquitous, so the significance of the finding depends on the patient’s symptoms, underlying lung condition, immune status, and radiologic findings.  
Firas El-Baba, MD; Donovan Watza, PhD; Ayman O. Soubani, MD

REVIEW ..............................................................................................................................

Ketogenic diets in the management of type 1 diabetes: Safe or safety concern?
A review of the potential risks and benefits for managing type 1 diabetes based on available evidence.
Lauren Anne Buehler, MD, MPH; Dawn Noe, RDN, LD, CDCES; Shannon Knapp, BSN, RN, CDCES; Diana Isaacs, Pharm D, CDCES; Kevin M. Pantalone, DO, ECNU, FACE

GUIDELINES TO PRACTICE ....................................................................................................

Risk-based guidelines: Redefining management of abnormal cervical cancer screening results
A shift from results-based to risk-based management, based on the patient’s immediate and 5-year risks of grade 3 or higher cervical intraepithelial neoplasia.
Amy Wiser, MD, FAAFP; Jeffrey D. Quinlan, MD, FAAFP; Pelin Batur, MD, FACP , NCMP

REVIEW ..............................................................................................................................

Coronary microvascular dysfunction: Considerations for diagnosis and treatment
A review of pathophysiology, considerations for invasive and noninvasive coronary function testing, management, and remaining knowledge gaps.
Benita Tjoe, MD; Lili Barsky, MD; Janet Wei, MD; Bruce Samuels, MD; Babak Azarbal, MD; C. Noel Bairey Merz, MD; Chrisandra Shufelt, MD, MS

SYMPTOMS TO DIAGNOSIS ....................................................................................................

Rapid cognitive decline and myoclonus in a 52-year-old woman
Symptoms also included confusion, blank staring, blurred vision, incoordination of the extremities, decreased verbal communication, and holding her left hand in a fist.
William Gravley, MS; Caleb Murphy, MD, MBA; Chia-Dan Kang, MD; Badrunnisa Hanif, MD
