From the Editor.................................................................................................................................................................................. 69

Why we publish The Clinical Picture

Gout remains very common—and often undertreated.

Brian F. Mandell, MD, PhD

The Clinical Picture........................................................................................................................................................................... 73

Cutaneous digital papules

Tophi in the finger pads call for aggressive urate-lowering therapy.

Hiroyuki Yano, MD; Mitsuyo Kinjo, MD, MPH

The Clinical Picture........................................................................................................................................................................... 75

Pacemaker lead-induced venous thoracic outlet syndrome

Acute arm swelling and pain after an airline flight and a missed anticoagulant dose.

Abhinav Sood, MBBS, MD; Daniel Benhuri, MD; Ujjwal Rastogi, MD; Ramesh M. Gowda, MD

The Clinical Picture........................................................................................................................................................................... 77

Severe chemical pneumonitis from tetrahydrocannabinol ‘vaping’ and ‘dabbing’

THC products have been implicated in an outbreak of lung injury.

Alisha Kamboj, MD, MBA; Tony Kamel, MD; Martin Burbank, MD; Melisa Esposito, MD; Russell Shaen Harvey, MD

1-Minute Consult.................................................................................................................................................................................. 81

How should you assess glycemic control if the hemoglobin A1c is inaccurate or uninterpretable?

Hemoglobin A1c is the standard but is not perfect. Alternatives are available.

Wendy O. Henderson, MD; Mary H. Parker, PharmD, FASHP, FCCP, BCPS, BCCP; Bryan C. Batch, MD, MHS

Symptoms to Diagnosis........................................................................................................................................................................ 86

Severe thrombocytopenia in a patient with otherwise asymptomatic COVID-19

A young woman, seemingly healthy, presented with easy bruising.

Lauren M. Granat, DO, MS; Achintya D. Singh, MBBS, MD; Matthew Cortese, MD, MPH; Vicente Velez, MD, FACP, FHM; Alan Lichtin, MD

Continued on Page 68
SYMPTOMS TO DIAGNOSIS

A 21-year-old woman with Ehlers-Danlos syndrome and persistent lightheadedness

She has a long history of lightheadedness upon standing, and it is getting worse.

Raed Qarajeh, MD; Laith A. Derbas, MD; Mouin Abdallah, MD, MSc; Faraz Kureshi, MD, MSc

GUIDELINES TO PRACTICE

Reversal of direct oral anticoagulants: Highlights from the Anticoagulation Forum guideline

Clear instructions on how to manage DOAC-associated bleeding.

Haeshik S. Gorr, MD; Lucy Yun Lu, PharmD, MS; Eric Hung, PharmD, CACP, AE-C

REVIEW

Oral immunotherapy: The answer to peanut allergy?

Gradually increasing doses of the allergen induces tolerance.

Rachel M. Whitset, APRN; Jaclyn A. Bjelac, MD; Ahila Subramanian, MD; Alice E. W. Hoyt, MD; Sandra J. Hong, MD

REVIEW

Cardiac surveillance for anti-HER2 chemotherapy

A more focused approach is advocated.

Patrick Collier, MD, PhD, FASE, FESC, FACC; Muzna Hussain, MD; Zoran B. Popovic, MD, PhD; Brian P. Griffin, MD

REVIEW

Precision treatment for metastatic non–small cell lung cancer: A conceptual overview

Targeted therapy has revolutionized treatment of patients with advanced solid tumors.

Tristan Lee, MD; Jeffrey M. Clarke, MD; Deepali Jain, MD; Sendhilation Ramalingam, MD; Vishal Vashistha, MD
