## From the Editor

**Awareness can prompt the search for clinical zebras**
When do we look hard for uncommon causes of common symptoms?

Brian F. Mandell, MD, PhD

## The Clinical Picture

**Median arcuate ligament syndrome: Incidental finding or real problem?**
A woman was admitted with pain in the epigastrium and right upper quadrant that radiated to the back, as well as nausea and dry heaves.

Bayarma Mandzhieva, MD; Hammad Zafar, MD; Akriti Jain, MD; Manoucher Manoucheri, MD, FACP

**Median arcuate ligament syndrome: A clinical dilemma**
Patients with chronic abdominal pain can benefit from a multidisciplinary evaluation.

John H. Rodriguez, MD, FACS

**A cutaneous clue to HIV infection**
A retired trucker presented with fever, cough, dyspnea, and a rash on his forehead.

Stephen Chan, MD; Paul Aronowitz, MD

**Not all wheezing is COPD**
A missed diagnosis led to inappropriate referral for lung transplant.

Vipul Patel, MD; Nikhil Madan, MD, FCCP

**All that wheezes...**
All that wheezes is not asthma, but it is airway obstruction of one kind or another.

Aparna Bhat, MD; Rendell W. Ashton, MD

**Anterior interosseous nerve palsy caused by Parsonage-Turner syndrome**
A 58-year-old man presented with difficulty moving his left hand.

Kosuke Ishizuka, MD; Kiyoshi Shikino, MD, PhD; Masatomi Ikusaka, MD, PhD
