# Table of Contents

**From the Editor**

- **Awareness can prompt the search for clinical zebras**
  - When do we look hard for uncommon causes of common symptoms?
  - Brian F. Mandell, MD, PhD

**The Clinical Picture**

- **Median arcuate ligament syndrome:**
  - Incidental finding or real problem?
  - A woman was admitted with pain in the epigastrium and right upper quadrant that radiated to the back, as well as nausea and dry heaves.
  - Bayarmaa Mandzhieva, MD; Hammad Zafar, MD; Akriti Jain, MD; Manoucher Manoucheri, MD, FACP

- **A cutaneous clue to HIV infection**
  - A retired trucker presented with fever, cough, dyspnea, and a rash on his forehead.
  - Stephen Chan, MD; Paul Aronowitz, MD

- **Not all wheezing is COPD**
  - A missed diagnosis led to inappropriate referral for lung transplant.
  - Vipul Patel, MD; Nikhil Madan, MD, FCCP

**Editorial**

- **Median arcuate ligament syndrome:**
  - A clinical dilemma
  - Patients with chronic abdominal pain can benefit from a multidisciplinary evaluation.
  - John H. Rodriguez, MD, FACS

- **All that wheezes...**
  - All that wheezes is not asthma, but it is airway obstruction of one kind or another.
  - Aparna Bhat, MD; Rendell W. Ashton, MD

- **Anterior interosseous nerve palsy caused by Parsonage-Turner syndrome**
  - A 58-year-old man presented with difficulty moving his left hand.
  - Kosuke Ishizuka, MD; Kiyoshi Shikino, MD, PhD; Masatomi Ikusaka, MD, PhD
