

SGLT-2 inhibitors for type 2 diabetes

In the January 2021 issue, in Tsushima Y, Lansang MC, Makin V. The role of SGLT-2 inhibitors in managing type 2 diabetes. *Cleve Clin J Med* 2021; 88(1):47–58. doi:10.3949/ccjm.88a.20088, a sentence on page 52 contained an error: “However, in January 2020, the 100-mg once-daily dose was approved

for use in patients with eGFR 30 to 44 mL/min/1.73 m² with urinary albumin excretion less than 300 mg/day.” The 100-mg once-daily dose was approved for use in patients with eGFR 30 to 44 mL/min/1.73 m² with urinary albumin excretion **more than** 300 mg/day. This has been corrected online.
