REVIEW .............................................................................................................................. 295

CABG: When, why, and how?  
The surgery has developed beyond a “cookie-cutter” generic cardiac operation.  
George Dimeling, MD; Laurice Bakaeen, PharmD; Jaikirshan Khatri, MD; Faisal G. Bakaeen, MD, FACS

LETTERS TO THE EDITOR ........................................................................................................ 260

Prostate cancer screening (To the Editor)  
The costs of PSA testing—both financial and to the patient’s well-being—are not worth it.  
Sherry Zhang, MD; Ian Jenkins, MD

LETTERS TO THE EDITOR ........................................................................................................ 260

Prostate cancer screening (To the Editor)  
Screening should be advised only if benefits clearly outweigh the risks  
Kevin Kurator, BS, BA; Ian Jenkins, MD

LETTERS TO THE EDITOR ........................................................................................................ 261

Prostate cancer screening (In Reply)  
Detection does not lead to overtreatment.  
Prasanna Sooriakumaran, MD, PhD, FRCSUrol, FEBU

LETTERS TO THE EDITOR ........................................................................................................ 262

Prostate cancer screening (In Reply)  
The debate about screening remains fraught, and passions run high on both sides.  
Timothy Gilligan, MD
