# Table of Contents

## From the Editor

**Heightening awareness of blistering disorders**

The spectrum of associated disorders ranges from annoying to life-threatening.

Brian F. Mandell, MD, PhD

## The Clinical Picture

**Evolving distal signs**

The patient’s evolving signs and symptoms prompted a reconsideration of his diagnosis.

Zackary D. Goff, MD; Sandra E. Zaeh, MD, MS; Michael K. Poku, MD; John N. Aucott, MD; Allan C. Gelber, MD

## Editorial

**Famous and not-so-famous physical findings in infectious endocarditis: A look back**

It is difficult to find a disease more emblematic of the practice of internal medicine.

Adam J. Brown, MD

## Symptoms to Diagnosis

**New bullous lesions in a 72-year-old woman**

Her history included psoriasis, chronic lower-extremity edema, and hypertension.

Hadrian Mendoza, MD; Justin Goodwin, MS; Jeffrey Gehlhausen, MD; Ian Odell, MD, PhD; Jennifer McNiff, MD; Karthik Gnanapandithan, MD

## Review

**Dual antiplatelet therapy after percutaneous coronary intervention: Personalize the duration**

A review of current guidelines on the duration of therapy and perioperative management.

Travis M. Howard, MD; Umesh N. Khot, MD

---

**Upcoming Features**

- Asthma management: The GINA report
- Exercise in older women
- Tobacco cessation: Current management options
