FROM THE EDITOR

'Guidelines to Practice' series: Asthma in adults 365

A clinically useful summary, highlighting the practical and newer conceptual aspects of the guidelines.

Brian F. Mandell, MD, PhD

THE CLINICAL PICTURE

Tuberous sclerosis complex 367

A rare disorder caused by mutations of tumor-suppressor genes.

Jesica Martín Carmona, MD; Elisabeth Gómez Moyano, MD, PhD; Ana Raquel de Castro Almeida, MD; Leandro Martínez Pilar, MD, PhD

THE CLINICAL PICTURE

Fever, rash, pruritus: Sweet syndrome 371

The patient received intramuscular and oral antibiotics at an urgent care center, but the symptoms worsened.

Giovani M. Zelada, MD; Paul B. Aronowitz, MD

THE CLINICAL PICTURE

Aspiration of a partial denture after an ischemic stroke 375

A bedside evaluation inaccurately led to the conclusion that it was safe to advance to a dysphagia diet.

Alisha Kamboj, MD, MBA; Zi Yu Liu, MD; Sharmila Price, MD; Michael Sun, MD

GUIDELINES TO PRACTICE

Outpatient management of asthma in adults: A snapshot of the 2020 GINA report 377

A review of the guidelines, with a focus on what's new and clinically important.

Kavya Kommaraju, MD; Mani Latifi, MD

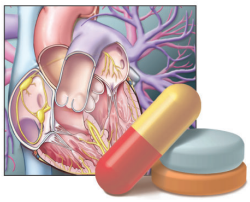
COMMENTARY

Statin intolerance and new lipid-lowering treatments 381

The benefits and safety of statin therapy are clear, but adverse effects continue to pose diagnostic and therapeutic challenges.

Oltion Mesi, MD; Charlie Lin, MD; Haitham Ahmed, MD, MPH; Leslie S. Cho, MD

1-MINUTE CONSULT



What antithrombotic therapy should I use for my patient with atrial fibrillation who underwent percutaneous coronary intervention or had an acute coronary syndrome? 389

The risk of thrombosis should be balanced with the risk of bleeding.

Andrew S. Tseng, MD, MPH; Fadi E. Shamoun, MD; Lisa A. Marks, MLS; Neera Agrwal, MD, PhD

REVIEW

The current state of tobacco cessation treatment 393

Behavioral interventions and pharmacotherapy increase success rates. Alternative treatments should not replace or delay the use of known effective therapies.

Humberto K. Choi, MD, FCCP; Jorge Ataucuri-Vargas, MD; Charlie Lin, MD; Amanda Singrey, PharmD, BCACP, CTTS

REVIEW CME MOC

Promoting physical activity in older women to maximize health 405

The optimal type, intensity, and level required to achieve specific health outcomes depend on the disease the patient and clinician are trying to prevent or manage.

Augustine Chavez, MD; Robert Scales, PhD; Juliana M. Kling, MD, MPH
