From the Editor

‘Guidelines to Practice’ series: Asthma in adults 365
A clinically useful summary, highlighting the practical and newer conceptual aspects of the guidelines.
Brian F. Mandell, MD, PhD

The Clinical Picture

Tuberous sclerosis complex 367
A rare disorder caused by mutations of tumor-suppressor genes.
Jesica Martín Carmona, MD; Elisabeth Gómez Moyano, MD, PhD; Ana Raquel de Castro Almeida, MD; Leandro Martínez Pilar, MD, PhD

Fever, rash, pruritus: Sweet syndrome 371
The patient received intramuscular and oral antibiotics at an urgent care center, but the symptoms worsened.
Giovani M. Zelada, MD; Paul B. Aronowitz, MD

Aspiration of a partial denture after an ischemic stroke 375
A bedside evaluation inaccurately led to the conclusion that it was safe to advance to a dysphagia diet.
Alisha Kamboj, MD, MBA; Zi Yu Liu, MD; Sharmila Price, MD; Michael Sun, MD

Guidelines to Practice

Outpatient management of asthma in adults: 377
A snapshot of the 2020 GINA report
A review of the guidelines, with a focus on what’s new and clinically important.
Kavya Kommaraju, MD; Mani Latifi, MD

Upcoming Features

- Anti-obesity drug therapy: Individualized, comprehensive
- Autoimmune encephalitis
- Teriparatide: Labeling changes, Long-term dosing
**COMMENTARY**

**Statin intolerance and new lipid-lowering treatments**

The benefits and safety of statin therapy are clear, but adverse effects continue to pose diagnostic and therapeutic challenges.

Oltion Mesi, MD; Charlie Lin, MD; Haitham Ahmed, MD, MPH; Leslie S. Cho, MD

---

**1-MINUTE CONSULT**

**What antithrombotic therapy should I use for my patient with atrial fibrillation who underwent percutaneous coronary intervention or had an acute coronary syndrome?**

The risk of thrombosis should be balanced with the risk of bleeding.

Andrew S. Tseng, MD, MPH; Fadi E. Shamoun, MD; Lisa A. Marks, MLS; Neera Agrwal, MD, PhD

---

**REVIEW**

**The current state of tobacco cessation treatment**

Behavioral interventions and pharmacotherapy increase success rates. Alternative treatments should not replace or delay the use of known effective therapies.

Humberto K. Choi, MD, FCCP; Jorge Ataucuri-Vargas, MD; Charlie Lin, MD; Amanda Singrey, PharmD, BCACP, CTTS

---

**REVIEW**

**Promoting physical activity in older women to maximize health**

The optimal type, intensity, and level required to achieve specific health outcomes depend on the disease the patient and clinician are trying to prevent or manage.

Augustine Chavez, MD; Robert Scales, PhD; Juliana M. Kling, MD, MPH
