## From the Editor

**Autoimmune brain disease: Think before testing** 420

Immune serologic tests are not specific for any defined clinical diagnosis and thus should not be used to drive therapeutic decisions.

Brian F. Mandell, MD, PhD

## The Clinical Picture

**Pseudopathologic vertebral body enhancement** 424

Contrast-enhanced computed tomography revealed sclerotic enhancement of the T1 vertebral body and the vertebral bodies from C2 to T2.

Yi Pan, MD; Peixin Tan, MD; Songxi Xie, MD; Jiewen Chen, MMed; Yi-Long Wu, MD

**Shedding light on subungual digital mucous cysts** 426

Transillumination is a quick and easy way to diagnose digital mucous cysts and rule out other subungual masses.

Taylor Bullock, BS; Daniel Michalik, MD; Rashmi Unwala, MD; John Anthony, MD

**Eruptive seborrheic keratosis: A perilous clue** 428

An abrupt increase in seborrheic keratoses in patients with an underlying malignancy is called the Leser-Trelat sign.

Akanksha Kaushik, MD; Souflia KT, MD; Manju Daroach, MD; Divya Aggarwal, MD; Pulkit Rastogi, MD, DM; Muthu Sendhil Kumaran, MD, DNB

## 1-Minute Consult

**Can I place a peripherally inserted central catheter in my patient with chronic kidney disease?** 431

Future need for permanent dialysis access is an important consideration.

Nora Hilda Hernandez Garcilazo, MD; Mohamed Hassanein, MD; Tushar J. Vachharajani, MD; Evamaria Anvari, MD
