TABLE OF CONTENTS

FROM THE EDITOR ................................................................................................................ 420

Autoimmune brain disease: Think before testing 420
Immune serologic tests are not specific for any defined clinical diagnosis and thus should not be used to drive therapeutic decisions.
Brian F. Mandell, MD, PhD

THE CLINICAL PICTURE ........................................................................................................ 424

Pseudopathologic vertebral body enhancement 424
Contrast-enhanced computed tomography revealed sclerotic enhancement of the T1 vertebral body and the vertebral bodies from C2 to T2.
Yi Pan, MD; Peixin Tan, MD; Songxi Xie, MD; Jiewen Chen, MMed; Yi-Long Wu, MD

THE CLINICAL PICTURE ........................................................................................................ 426

Shedding light on subungual digital mucous cysts 426
Transillumination is a quick and easy way to diagnose digital mucous cysts and rule out other subungual masses.
Taylor Bullock, BS; Daniel Michalik, MD; Rashmi Unwala, MD; John Anthony, MD

THE CLINICAL PICTURE ........................................................................................................ 428

Eruptive seborrheic keratosis: A perilous clue 428
An abrupt increase in seborrheic keratoses in patients with an underlying malignancy is called the Leser-Trelat sign.
Akanksha Kaushik, MD; Soufila KT, MD; Manju Daroach, MD; Divya Aggarwal, MD; Pulkit Rastogi, MD, DM; Muthu Sendhil Kumaran, MD, DNB

1-MINUTE CONSULT .............................................................................................................. 431

Can I place a peripherally inserted central catheter in my patient with chronic kidney disease?
Future need for permanent dialysis access is an important consideration.
Nora Hilda Hernandez Garcilazo, MD; Mohamed Hassanein, MD; Tushar J. Vachharajani, MD; Evamaria Anvari, MD
