The initial viral infection may be only part of the story 476
We clearly see that the coronavirus elicits syndromes far afield from respiratory tissues. But a virus eliciting effects seemingly distinct from the primary infection is nothing new.
Brian F. Mandell, MD, PhD

Abdominal pseudohermia due to herpes zoster 480
A 66-year-old man presents with bulging and persistent burning pain in the right abdominal side for 4 days.
Junki Mizumoto, MD

Leriche syndrome 482
Physical examination revealed pallor of the toes, cold extremities, dry skin, and absence of bilateral femoral pulses. The patient also disclosed erectile dysfunction.
Hiroki Matsuura, MD; Hiroyuki Honda, MD, PhD

Dermatomyositis-related interstitial lung disease mimicking COVID-19 pneumonia 484
A subtype of myositis with characteristic skin rashes and ulcers, amyopathic or hypomyopathic symptoms, and rapidly progressive ILD.
Satoshi Hayano, MD; Kenichiro Tokunaga, MD; Yusuke Imamura, MD; Hideto Oshikawa, MD

An uncommon cause of chest pain 487
Re-review of a “normal” chest radiograph provided valuable clues.
Salman Salahuddin, MD, DM, MRCP (UK)
COMMENTARY

Teriparatide: Label changes and identifying patients for long-term use
The changes leave clinicians with the challenge of identifying appropriate patients.
Paul D. Miller, MD, HDSc (HON); E. Michael Lewiecki, MD; Kelly Krohn, MD; Elliott Schwartz, MD

SYMPTOMS TO DIAGNOSIS

An 86-year-old man with unexplained right-sided headache and vision loss
Steroid treatment for suspected giant cell arteritis brought no improvement in vision or headache severity.
Marc Ohlhausen, BS; Eden Bernstein, MD; Craig D. Nielsen, MD, FACP

REVIEW

Stress testing and noninvasive coronary imaging: What’s the best test for my patient?
A review of current tests, what they measure, their diagnostic and prognostic value, and their limitations.
Milad Matta, MD; Serge C. Harb, MD; Paul Cremer, MD; Rory Hachamovitch, MD, MSc; Chadi Ayoub, MD, PhD, FACC, FASE, FSCCT

REVIEW

Medical, ethical, and legal aspects of end-of-life dilemmas in the intensive care unit
Three hypothetical cases elucidate medical, ethical, and legal considerations in common end-of-life situations encountered in the ICU.
Jonathan Wiesen, MD; Christopher Donatelli, MD; Martin L. Smith, STD; Laurel Hyle, JD, MPH; Eduardo Mireles-Cabodevila, MD
