**FROM THE EDITOR**

Why I, as a rheumatologist, am happy to make the diagnosis of obstructive sleep apnea 712

Why should a rheumatologist have special interest in this disorder? The answer lies in 2 major reasons patients are referred for a rheumatology consultation: fatigue and inflammation.

Brian F. Mandell, MD, PhD

**THE CLINICAL PICTURE**

Oral lichen planus 717

Risk factors include medications, dental materials, and viral infections such as hepatitis C.

Sanjana Mathew, MBBS; Carol Lobo, MBBS, MD; Meryl Antony, MBBS, MD

Stiff hands in a man with type 1 diabetes 721

The patient had been on injectable insulin for the past 6 years, with frequent dose titrations because of poor control. A recent hemoglobin A1c was 7.2%.

Rhea Ahuja, MD; Purn Pragya, MBBS

**1-MINUTE CONSULT**

Should my patients take their blood pressure medications in the evening to enhance cardiovascular benefit? 725

The focus should be to achieve blood pressure control and facilitate adherence, regardless of the timing of the medications.

Elias Bassil, MD; George Thomas, MD; Jagmeet Dhingra, MD; Ali Mehdi, MD, MEd, FACP, FASN

COMMENTARY

Hey, Doc: Could the 2023–2024 cold and flu season finally be the calm after the storm?
The author answers questions patients may have about the currently available influenza, COVID-19, and respiratory syncytial virus vaccines.
Sherif Beniameen Mossad, MD, FACP, FIDSA, FAST

SYMPTOMS TO DIAGNOSIS

The drop of a pin: Accidental ingestion of a sharp foreign body
If endoscopic retrieval fails, conservative management may be appropriate with daily abdominal radiography.
Mina Rismani, MD; Adrian Pona, MD; Monia E. Werlang, MD

REVIEW

Contemporary surgical and procedural management of benign prostatic hyperplasia
The authors provide an overview of currently available and guideline-backed treatments.
Ayodeji E. Sotimehin, MD; Eiftu Haile, MD; Bradley C. Gill, MD, MS

REVIEW

Treatments for obstructive sleep apnea: CPAP and beyond
Options include behavioral interventions, oral appliances, nasal expiratory positive airway pressure, negative pressure interventions, and surgical procedures. Certain drugs are also promising.
Loutfi S. Aboussouan, MD; Aparna Bhat, MD; Todd Coy, DMD; Alan Kominsky, MD
