

# TABLE OF CONTENTS

**FROM THE EDITOR** .....

**Celiac disease in the ‘nonclassic’ patient** **327**

Adherence to a strict gluten-free diet is not easy, and even strict adherence does not guarantee relief of all symptoms. We need to be as certain as possible that trying the diet makes sense—and that is the real challenge.

Brian F. Mandell, MD, PhD

**THE CLINICAL PICTURE** .....

**Eruption of erythema after dieting** **335**

During the past 4 weeks, the patient had been increasing his exercise and was on a strict diet for bodybuilding.

Li-wen Zhang, MD; Wen-ju Wang, MD; Tao Chen, MD, PhD; Rong-hua Xu, MD

**THE CLINICAL PICTURE** .....

**Finger nodules: Tip of the gouty iceberg** **337**

Recurrent, dramatic flares are the cardinal symptom of gouty disease, but some patients exhibit tophi on physical examination or imaging—without flares or pain.

Brian F. Mandell, MD, PhD

**SMART TESTING** ..... **CME MOC**

**Serial serum lipase testing after the initial diagnostic workup for inpatients with acute pancreatitis: What is the evidence?** **341**

Beyond the initial diagnostic workup, the results of serial testing may be misleading, with the potential for adverse effects on patient care and increases in healthcare spending.

Samantha Jill Magier, MD, MEng; Thiruvengadam Muniraj, MD, FRCP; Naseema Merchant, MBBS, FCCP, FACP, FHM

**1-MINUTE CONSULT** .....

**Should urine antigen testing for *Legionella pneumophila* be ordered for all hospitalized patients with community-acquired pneumonia?** **345**

Testing is recommended if the pneumonia is severe, if there has been recent travel, and if there is currently an outbreak of legionnaires disease.

Anna Cheek, MD; Ian Jackson, MD; Manasa Velagapudi, MBBS; Shraddha Narechania, MD, FCCP

**1-MINUTE CONSULT** .....

**Celiac disease: Who should I test, and how? 349**

First-degree relatives of patients with celiac disease and patients with dermatitis herpetiformis, type 1 diabetes mellitus, and autoimmune thyroid disease are among those for whom testing is advisable.

Jason Nasser, MD; Claire Jansson-Knodell, MD; Alberto Rubio Tapia, MD

**GUIDELINES TO PRACTICE** .....

**Guidelines for the management of trigeminal neuralgia 355**

Care pathways for patients with trigeminal neuralgia vary widely. The most recent UK guidelines emphasize the need for evidence-based care plans for multidisciplinary management.

Mun Seng Chong, MBBS, MD, FRCP; Anish Bahra, MBChB, MD, FRCP; Joanna M. Zakrzewska, BDS, MB BChir, MD, FDSRCS, FFDRCSI, FFPM RCA, FHEA

**REVIEW** .....

**Measuring exhaled nitric oxide when diagnosing and managing asthma 363**

The authors examine the role of this biomarker of airway inflammation and provide guidance for its appropriate use.

Payal Sen, MD; Sumita B. Khatri, MD; Vickram Tejwani, MD

**REVIEW** ..... **CME MOC**

**Deadly drug rashes: Early recognition and multidisciplinary care 373**

An illustrated review of 4 severe drug rashes. Early recognition and prompt withdrawal of the causative agent are crucial.

Valerie Jaroenpuntaruk, MD; Adam Gray, MD

**LETTERS TO THE EDITOR** .....

**Chondrodermatitis nodularis helioides 333**

Li-wen Zhang, MD; Juan Wu, MD, PhD; Tao Chen, MD, PhD

**In Reply: Chondrodermatitis nodularis helioides 333**

Maggie So, MD, FACP; Randall S. Edson, MD, MACP, FIDSA
