FROM THE EDITOR

Newer diabetes drugs: Surprising shared benefits and unique side effects 457

The shared beneficial effects of the SGLT2 inhibitors and the GLP-1 receptor agonists, drugs with distinct mechanisms of action, may have an anti-inflammatory explanation.

Brian F. Mandell, MD, PhD

THE CLINICAL PICTURE

Refractory granuloma annulare 461

A 77-year-old woman presented with a rash characterized by orange-yellow papules coalescing into erythematous annular plaques on her hands, trunk, and legs.

Mery Deeb, MD; Hadeel Zainah, MD

1-MINUTE CONSULT

Does my patient need testing for PFAS 'forever chemicals'? 463

Any patient has the right to undergo blood testing for PFAS, but the limitations of testing must be discussed with the patient.

Philip Zuccaro, BS; Damaskini Valvi, MD, MPH, PhD; Vasilis Vasiliou, PhD

1-MINUTE CONSULT

Should I consider single-pill combination antihypertensive therapy for my patient with high blood pressure? 467

For many patients, starting treatment with a single-pill combination should be considered for the initial management of hypertension.

Maximilian C. Volk, DO; Ahmad Safdar, MD; Luke J. Laffin, MD

EDITORIAL

Evolving paradigms in hypertension management: Fixed-dose single-pill combinations and future therapies 471

Despite the availability of effective medications, blood pressure control rates have declined over the past decade, underscoring the need for improved treatment approaches.

George Thomas, MD

Upcoming Features

- Optimizing hypertension treatment: Evidence-based approaches and new drugs
- An overview of over-the-counter contraceptives: Spotlight on daily oral norgestrel

MEDICAL GRAND ROUNDS

The overlooked and undertreated perils of premature ovarian insufficiency 475

Physicians should be alert to the possibility of undiagnosed premature ovarian insufficiency—loss of ovarian function before age 40—and know what to do if the condition is suspected.

Samantha F. Butts, MD, MSCE

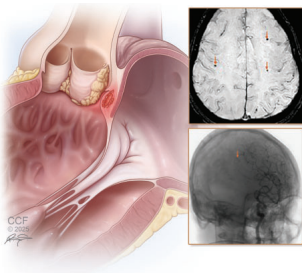
REVIEW CME MOC

Glucagon-like peptide-1 receptor agonists and pancreatitis: A reconcilable divorce 483

Early trials suggested a link between GLP-1 receptor agonists and pancreatitis, but recent large meta-analyses do not support a class-wide risk.

Adi E. Mehta, MD; Laura D. Lomeli, BA; Kevin M. Pantalone, DO, ECNU

REVIEW



Cerebrovascular complications in infective endocarditis: Challenges and considerations in management 491

Although the cerebrovascular complications of infective endocarditis such as ischemic strokes and intracranial hemorrhages are common and serious, data remain scarce regarding how best to prevent, predict, and manage them.

Vikyath Satish, MD; Maisha Maliha, MD; Abhyuday Chauhan, MD; Nieves del Mar Morales-Gomez, MD; Safwan Gaznabi, MD; Daniel Lorenzatti, MD; Justin Johannesen, MD; Carlos A. Gongora, MD; Annalisa Filtz, MD; Mario J. Garcia, MD; Leandro Slipczuk, MD, PhD; Aldo L. Schenone, MD

REVIEW

Managing the side effects of sodium-glucose cotransporter-2 inhibitors 503

The authors review recent evidence on the side effects of sodium-glucose cotransporter-2 inhibitors and corresponding strategies for preventing and managing them.

Nandan Kodur, BS; Betemariam Sharew, BA; M. Cecilia Lansang, MD, MPH; W. H. Wilson Tang, MD
